Subject Index

Biomass
Tropical forest biomass estimation from truncated stand tables 69
Broad-leaved forest
Simulation and future projection of succession in a Swedish broad-leaved forest 305
Colonization
Colonization of Cape fynbos communities by forest species 277
Conifers
Mixed-conifer seedling growth varies in response to overstory release 179
Dalbergia
Seed and seedling traits of *Dalbergia sissoo* Roxb.: seed source variation studies among ten sources in India 265
Deficiency
Multiple mineral deficiencies in forest plantations in Liberia 121
Dendrochronological analysis
Dendrochronological analysis of single-tree interactions in mixed pine–oak stands of central Arizona, USA 321
Dynamic programming
Dependence of rotation and thinning regime on economic factors and silvicultural constraints: results of an application of dynamic programming 345
Dynamics
Long-term cyclic dynamics of simulated riparian forest stands 217
Edge effects
Quantifying edge effect and patch size for multiple-use silviculture—a discussion paper 249
Estimations
Enhanced estimates of total volume with any single upper-stem measurement 55
Tropical forest biomass estimation from truncated stand tables 69
Utility of reverse Weibull and extreme value density functions to refine diameter distribution growth estimates 165
Eucalyptus
Double-ridge mounds improve tree establishment in saline seeps 89
On the susceptibility of *Eucalyptus* species and clones to attack by *Macrotermes natalensis* Haviland (Isoptera: Termitidae) 15
Testing the expression of resistance to insect attack: Resistance of jarrah (*Eucalyptus marginata*) to jarrah leafminer (*Perthida glyphopa*) 99
Extreme Value density
Stand table prediction with Reverse Weibull and Extreme Value density functions: some theoretical considerations 175
Utility of reverse Weibull and extreme value density functions to refine diameter distribution growth estimates 165
Forest succession
Simulation and future projection of succession in a Swedish broad-leaved forest 305

Fumigants
Evaluation of the comparative efficacy of fumigants and acute poison baits against Indian crested porcupine, *Hystrix indica* 295
Fynbos
Colonization of Cape fynbos communities by forest species 277
Growth
Mixed-conifer seedling growth varies in response to overstory release 179
Juniperus
The seasonal course of physiological processes in *Juniperus occidentalis* 185
Macrotermes
On the susceptibility of *Eucalyptus* species and clones to attack by *Macrotermes natalensis* Haviland (Isoptera: Termitidae) 15
Management
Multiobjective Dynamic Programming for forest resource management 43
Minerals
Multiple mineral deficiencies in forest plantations in Liberia 121
Mounds
Double-ridge mounds improve tree establishment in saline seeps 89
Multiobjective Dynamic Programming
Multiobjective Dynamic Programming for forest resource management 43
Mycorrhiza
Mycorrhiza and root nodulation in tree seedlings from five nurseries in Ethiopia and Somalia 335
Nesting sites
Availability of nesting sites as a limit to woodpecker populations 31
Nitrogen
Effect of annual weeds on water and nitrogen availability to *Pinus radiata* trees in a young plantation 145
Nitrogen-fixing
Nodulation of nine nitrogen-fixing tree species grown in central Sudan 107
Nodulation
Mycorrhiza and root nodulation in tree seedlings from five nurseries in Ethiopia and Somalia 335
Nodulation of nine nitrogen-fixing tree species grown in central Sudan 107
Patch size
Quantifying edge effect and patch size for multiple-use silviculture—a discussion paper 249
Perthida
Testing the expression of resistance to insect attack: Resistance of jarrah (*Eucalyptus marginata*) to jarrah leafminer (*Perthida glyphopa*) 99
Pests
Testing the expression of resistance to insect attack: Resistance of jarrah (*Eucalyptus marginata*) to jarrah leafminer (*Perthida glyphopa*) 99
Pinus
Dendrochronological analysis of single-tree interactions in mixed pine–oak stands of central Arizona, USA 321
Effect of annual weeds on water and nitrogen availability to *Pinus radiata* trees in a young plantation 145
Poison baits
Evaluation of the comparative efficacy of fumigants and acute poison baits against Indian crested porcupine, *Hystrix indica* 295

Porcupine
Evaluation of the comparative efficacy of fumigants and acute poison baits against Indian crested porcupine, *Hystrix indica* 295
Prosopis
Discovery of thornless, non-browsed, erect tropical *Prosopis* in 3-year-old Haitian progeny trials 1
Quercus
Dendrochronological analysis of single-tree interactions in mixed pine–oak stands of central Arizona, USA 321
Oak overstory/reproduction relations in two xeric ecosystems in Michigan 233
Reverse Weibull
Stand table prediction with Reverse Weibull and Extreme Value density functions: some theoretical considerations 175
Utility of reverse Weibull and extreme value density functions to refine diameter distribution growth estimates 165
Riparian forest
Long-term cyclic dynamics of simulated riparian forest stands 217
Rotation
Dependence of rotation and thinning regime on economic factors and silvicultural constraints: results of an application of dynamic programming 345
Saline seeps
Double-ridge mounds improve tree establishment in saline seeps 89
Seasons/Seasonality
The seasonal course of physiological processes in *Juniperus occidentalis* 185
Seed
Seed and seedling traits of *Dalbergia sissoo* Roxb.: seed source variation studies among ten sources in India 265
Seedlings
Mycorrhiza and root nodulation in tree seedlings from five nurseries in Ethiopia and Somalia 335
Seed and seedling traits of *Dalbergia sissoo* Roxb.: seed source variation studies among ten sources in India 265
Silviculture
Dependence of rotation and thinning regime on economic factors and silvicultural constraints: results of an application of dynamic programming 345
Quantifying edge effect and patch size for multiple-use silviculture—a discussion paper 249
Sudan
Nodulation of nine nitrogen-fixing tree species grown in central Sudan 107
Termites
On the susceptibility of *Eucalyptus* species and clones to attack by *Macrotermes natalensis* Haviland (Isoptera: Termitidae) 15
Thinning
Dependence of rotation and thinning regime on economic factors and silvicultural constraints: results of an application of dynamic programming 345
Mixed-conifer seedling growth varies in response to overstory release 179
Total volume equations
Enhanced estimates of total volume with any single upper-stem measurement 55
Tropical forest
Tropical forest biomass estimation from truncated stand tables 69

Water
Effect of annual weeds on water and nitrogen availability to *Pinus radiata* trees in a young plantation 145
Weeds
Effect of annual weeds on water and nitrogen availability to *Pinus radiata* trees in a young plantation 145
Woodpecker
Availability of nesting sites as a limit to woodpecker populations 31
Xeric ecosystems
Oak overstory/reproduction relations in two xeric ecosystems in Michigan 233
